## Quick facts

-  Company: FLEX
-  Sector: Health
-  Product / service: Application
-  Type of data: Geospatial data, health data
-  Origin: Greece

## Benefits

-  Flex – Mobile Dementia Assistant is an ICT solution that aspires to drastically improve the quality of life of people with Alzheimer’s disease and dementia, as well as all other individuals’ affected (family members –caregivers)

## How Open Data is used

-  Flex combines Open Data with data from Biosensor wearable devices that process real time data (vital signs) in order to safeguard the patients’ health and safety by actually reacting to the patient’s needs. With features such as “Shopping & Walking Assistant”, FLEX enables patients to safely perform everyday activities, while family members and caregivers are able to track their moves and health status.

## Other information

-  FLEX is supported by Finodex. Finodex is one of the 16 accelerators of the FIWARE Accelerate Programme. It is co-funded by the European Union to support SMEs and Web Entrepreneurs to develop products, services building upon FIWARE technologies.
