Quick facts

-  Company: HybridStat
-  Sector: Health
-  Product / service: Service
-  Type of data: Biological and bioinformatics
-  Origin: Greece

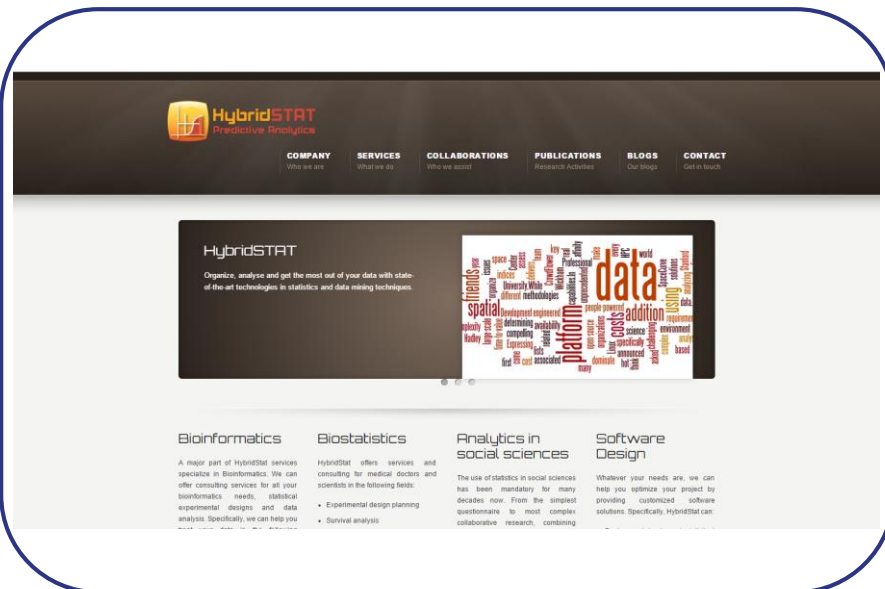

Benefits

-  With their analysis of Open Data, clinical biologists can reach faster conclusions on the situation of the patient.

How Open Data is used

-  They combine Open Data on gene-disease associations with the outcome of their own analyses on raw DNA sequencing.
-  They use Open Data from openly available databases such as Disgnet and from biomedical literature.

The screenshot shows the HybridStat website with a navigation menu (COMPANY, SERVICES, COLLABORATIONS, PUBLICATIONS, BLOGS, CONTACT) and a main content area featuring a word cloud and sections for Bioinformatics, Biostatistics, Analytics in social sciences, and Software Design.

Other information

-  They are planning to publish their data as well as Open Data and to allow users to use their platform.
-  They want to encourage clinical biologists to share their insights with the community.
