

URL <http://publicamundi.eu>**Quick facts**

- Company: PublicaMundi
- Sector: Other
- Product / service: Website
- Type of data: Geospatial
- Origin: Greece

**Benefits**

- Reduce time to publish geospatial data
- Access to all published data
- Build value added services and applications

**How Open Data is used**

- Makes geospatial data ready to be published
- Get advanced geospatial capabilities
- Offer commercial value added services from open data

**Quotes from the website of PublicaMundi**

“The vickery report estimates the benefits of extended PSI (Pubic Sector Information) reuse for the EU27 economy at 140b€/year (1.7% GDP 2008).”

“Despite the importance of open geospatial data, they are increasingly difficult to discover and reuse, especially in a cross-boundary multilingual context.”

“Geospatial data account for an estimated 80% of public sector information and are the most significant category of open public data due to their high production, procurement and update costs, as well as their relevance in multiple thematic areas and domains.”

What more can PublicaMundi do with geospatial data

- Construct Spatial Data Infrastructure
- Repurpose data and service of current spatial data infrastructure
- Providing web (and mobile) maps
- Building both web and mobile applications
