Quick facts

-  Company: Otthontérkép
-  Sector: Regions & Cities
-  Product / service: Application
-  Type of data: Other
-  Origin: Hungary

Benefits

-  Otthontérkép helps people who are looking to buy or sell real estate by providing statistical data about different areas such as the average real estate prices, parking prices, green spaces, criminal or demographic statistics, public transport facilities, schools, etc.

How Open Data is used

-  If you want to sell your house, you have to complete a detailed data sheet which will be uploaded to the data base.
-  If you want to buy a house, you fill in your search criteria and the database will find property and statistical data about the area for you.
-  A report function can be used to report incorrect information or when a property is no longer for sale, or advertisements can be updated.

Otthontérkép

Other information

-  Otthontérkép's mission is to divert the domestic real estate advertising market towards quality advertisements and to eliminate data sheets containing incorrect information.
-  To make use of the application, one needs to register first.
