Quick facts

 Company:	Kiss my Bike
 Sector:	Transport
 Product / service:	Service
 Type of data:	Crime data
 Origin:	Italy

Benefits

-  The core service provided by the system is theft detection and tracking of bicycle location.

How Open Data is used

-  In addition to the core service, two Open Data enabled prevention and retrieval services are offered that ensure bicycle safety and cyclists' comfort. A prevention service includes safety level estimation and parking recommendations based on Open Data on reported bicycle thefts. Bicycle owners are also assisted in a legal retrieval process by providing them with Open Data on emergency numbers and locations of nearest police stations.

Other information

-  The Kiss my Bike system heavily relies on open source solutions. By reusing existing technologies instead of implementing all the functionalities by themselves, Kiss my Bike could considerably reduce their software development effort.
