## Quick facts

-  Company: Kenedict
-  Sector: Public
-  Product / service: Application
-  Type of data: Public Sector Information
-  Origin: Netherlands

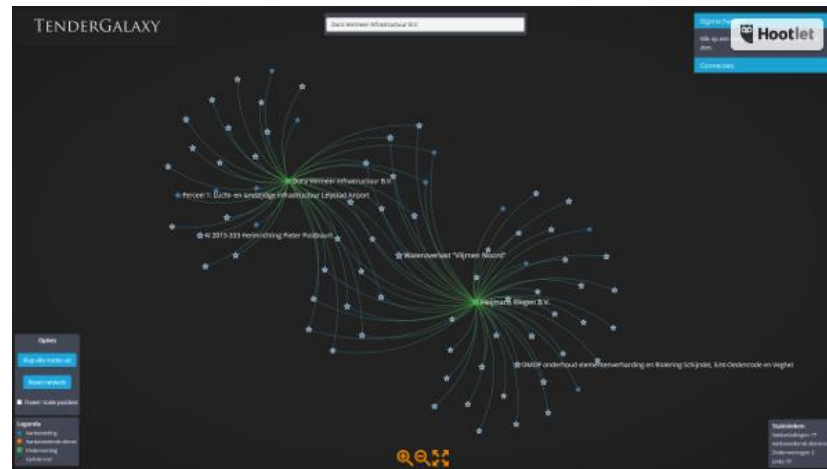

## Benefits

-  TenderGalaxy is a web application that allows visitors to interactively browse the connections between Dutch government entities, their published tenders, and the businesses interested in these tenders.

## How Open Data is used

-  The application builds on open data published on the Dutch marketplace for public tenders, TenderNed.
-  The full dataset includes 10,672 nodes (5,938 tenders, 1,084 government entities and 3,650 businesses), and 14,630 connections between them.

## Context

-  The application was built by Kenedict at the Dutch Accountability Hack in 2016, where it won the second prize.
-  A future version of the tool will integrate further historical data, and will be made available as soon as new open data is published on the TenderNed website
