

URL <https://play.google.com/store/apps/details?id=net.kaupangtrafikkflyt>

Quick facts

- Company: Trafikkflyt
- Sector: Transportation
- Product / service: Application
- Type of data: Transportation
- Origin: Norway

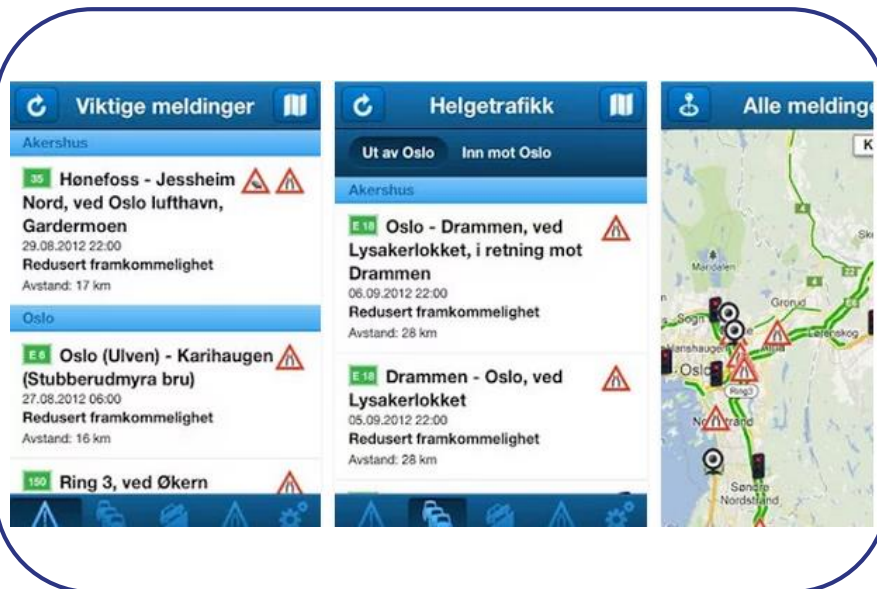

Benefits

- Better flow of traffic, as the application indicates the traffic density and the location of events

How Open Data is used

- Information from the National Public Road Administrations is used to create maps of the traffic density.
- Events held are listed and pointed on a map, such that people can avoid busy places.

The image shows three screenshots of the Trafikkflyt application. The first screenshot, titled 'Viktige meldinger' (Important messages), lists traffic alerts for Akershus, including a delay on the Honefoss - Jessheim road (E6) and a delay on the Oslo (Ulven) - Karihaugen road (E6). The second screenshot, titled 'Helgetrafikk' (Holiday traffic), shows alerts for the Oslo - Drammen road (E10) and the Drammen - Oslo road (E16). The third screenshot shows a map titled 'Alle meldinger' (All messages) with various traffic alerts marked on a map of the Oslo region.

Future plans

- Update application with bug fixes constantly.
