Quick facts

- Company: Evox
- Sector: Transportation
- Product / service: Mobile Application
- Type of data: Transportation
- Origin: Portugal

Benefits

- 360Waste collects volumetric information from containers which allows more efficient waste collection, reduces logistics costs and operating costs and decreases pollution.

How Open Data is used

- 360Waste uses sensors on all types of containers that show which containers should be emptied and which not, allowing for more efficient waste collection.
- An online platform with centralised information provides the possibility for good planning and route optimisation.

360WASTE
Serviço moderno e integrado para a gestão da recolha de resíduos.
Compatível com diferentes tipos de contentores e resíduos.

Other information

- The sensors also detect fire hazards in containers.
- The contract is placed in the contract free market.
