## Quick facts

- Company: MentalCheck
- Sector: Health
- Product / service: Application
- Type of data: Health and drugs
- Origin: Spain

## Benefits

- MentalCheck offers customers the possibility to personalise and create specific templates for the recording of a diversity of mental health disorders and symptoms, to generate reports on the patients evolution and export the data for its statistical analysis.

## How Open Data is used

- MentalCheck consists of a multi-modal tool which integrates psychological and physiological data, identifies symptoms and provides interactive real-time feedback. Open Data is used in the system to provide relevant drug information and to assess and compare the quality of mental health services.

## Other information

- The MentalCheck project follows the Lean Startup Methodology and its commercialisation is based on a freemium model.
