Check that bike!
Database

Re-use

URL
https://checkthatbike.co.uk/

Quick facts
- Company: Check that bike!
- Sector: Public
- Product / service: Database
- Type of data: Crime
- Origin: UK

Benefits
- Bike theft becomes a less attractive crime (and hence saving police force resources)
- Refer users to the appropriate authorities

How Open Data is used
- Records by police forces, bicycle insurers and stolen property registers are aggregated such that check can be done across them

38 Sources of Data
Including police forces, registers and insurers.

Open Data
We are working to get police forces to openly release stolen property information.

Over 70,000 Stolen Bikes
Ten times more than other bike checking services.

Clear Guidance
We provide the information you need to avoid buying a stolen bike.

Open Statistics
Our KPI information is available to anyone.

Mobile Friendly
Our responsive website works on both mobiles and tablets.

Future plans
- Expand to other types of stolen property (total car check is already online)
