Quick facts

- Company: OpenSensors
- Sector: IT
- Product / service: Service
- Type of data: IT
- Origin: United Kingdom

Benefits

- OpenSensors can enable individuals and organizations build better and more efficient systems.
- OpenSensors has the potential to unlock value and encourages cost saving across a number of industries.
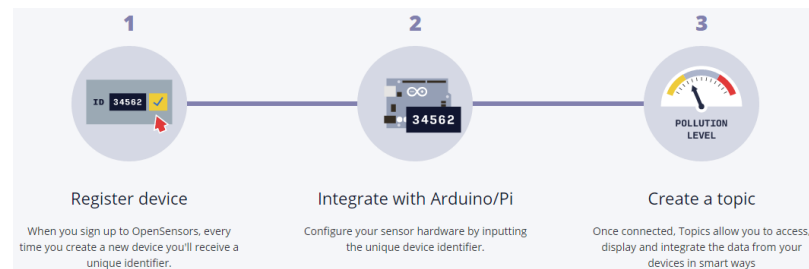

How Open Data is used

- Connecting the data of complex sensors.
- OpenSensors.io offers advanced connectivity of devices, systems, and services that goes beyond machine-to-machine (M2M) communications and covers a variety of protocols, domains, and applications.

Build a connected world.
Connect and manage your things and data.

1 Register device
When you sign up to OpenSensors, every time you create a new device you'll receive a unique identifier.

2 Integrate with Arduino/Pi
Configure your sensor hardware by inputting the unique device identifier.

3 Create a topic
Once connected, Topics allow you to access, display and integrate the data from your devices in smart ways

Future plans

- The OpenSensors model will naturally expand as more and more Open Data is published and then able to be connected.
