Quick facts

-  Company: M/A
-  Sector: IT
-  Product / service: Product
-  Type of data: Health
-  Origin: United Kingdom

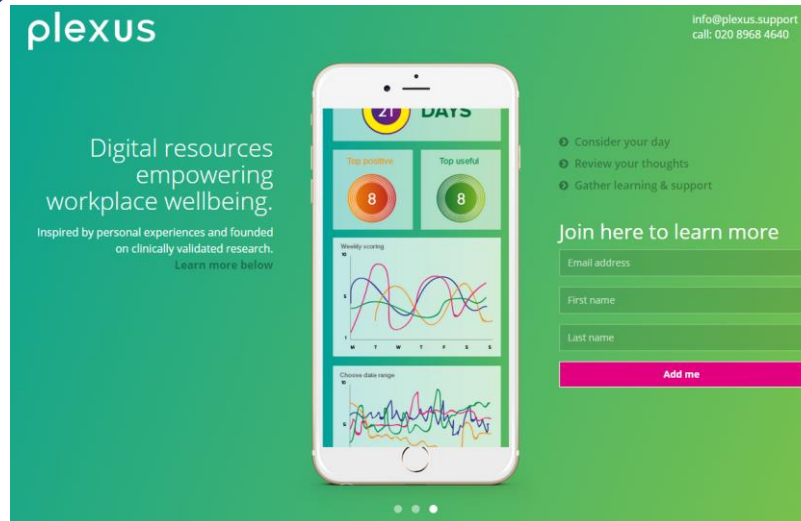

Benefits

-  Making it easier for those with mental health conditions to find support and manage their conditions.
-  Reducing the number of people going to Accident & Emergency units.

How Open Data is used

-  Using healthcare and employment related data to provide a range of services via the application Plexus.
-  The app can be used to find Mind and NHS support services in local areas, find routes into volunteering, part- or full-time employment, and help people navigate job applications to meet their requirements.

Future plans

-  M/A is planning on continuing to develop the Plexus app, probably through a partnership with Mind, and will be releasing more of Mind's datasets.
-  They also plan on using more data being released by the UK's Department for Work and Pensions.
