Quick facts

- Company: What Works Network
- Sector: Public service
- Product / service: Evaluation of Public Services
- Type of data: Multiple domains
- Origin: United Kingdom

Benefits

- Improving the way government and other organisations create, share and use high quality evidence for decision-making.
- It supports more effective and efficient services across the public sector at national and local levels.

How Open Data is used

- Collating existing evidence on how effective policy programmes and practices are.
- Producing high quality synthesis reports and systematic reviews in areas where they do not currently exist.
- Assessing how effective policies and practices are against an agreed set of outcomes. Sharing findings in an accessible way.

Future plans

- Further expanding its services to the whole of the United Kingdom.
- Furthering the evaluation on public policy by means of more involvement of the public.
