Quick facts

- 👤 Company: GetTheData
- 👤 Sector: Regions & Cities
- 👤 Product / service: Website
- 👤 Type of data: Geographical data
- 👤 Origin: United Kingdom

Benefits

- 👤 Get The Data structure Open Data in the United Kingdom by location in order to aid dataset discovery and signpost the source.
- 👤 People can find datasets faster, or unknown datasets. This stimulates data related job performance and productivity.

How Open Data is used

- 👤 Get The Data uses Open Data to create geographical dashboards, which help the public and data professionals to locate that data and understand how the licence permits its reuse.
- 👤 It uses geocoded Open Data mainly from UK public sector organisations, for example, Companies House, Defra, Ordnance Survey, Department for Education, Ofcom.

GetTheData

We organise UK open data by location and signpost the source.

GetTheData

Other information

- 👤 This website offers a unique way of discovering what data is available without knowing in advance whether a dataset exists. For example, by searching a UK postcode, one might discover that broadband speed is available for that postcode.
